Accident dispute

AAah!

Ouch!

It's been two weeks, but I still have pain!

You should see your doctor.

I'm writing you a note, you need to take some rest.
What? The CNESST¹ is rejecting by application? The delayed medical consultation means it cannot be deemed to have happened in the workplace? I should have called my union earlier!

At the union office...

I knew this would happen! The appeal upheld the CNESST ruling. Now we need to challenge the ruling before the Tribunal administratif du travail. It will take at least a year before your case is heard.

At the Tribunal administratif du travail...

Why did you wait before seeing a doctor?

Maybe the pain was not bad enough? Maybe it existed before the fall?

What did you do in the days following the fall?

¹CNESST: Commission des normes, de l’équité, de la santé et de la sécurité du travail.
